# 1 Introduction

The Rotorthon competition focuses on innovation in the VTOL sector.

The online challenge is a seven (7) day challenge, at the end of which the teams shall deliver their solution to the problem proposed.

The topic of the online challenge is proposed by one of the Technical Jury members and agreed on by the rest of the Jury.

## 2 Delivery

### 2.1 Required material

The teams are required to deliver the following:

1. Abstract summarising the solution. The abstract shall be of maximum 250 words.
2. Presentation explaining their solution. The presentation shall be in .pdf or .pptx format and of maximum 20 slides.
3. Video in which the presentation (see point 2) is interactively showcased. The video shall be of maximum 15 minutes.

### 2.2 Delivery Procedure

The material shall be delivered via email to [rotorthon.2025@euroavia.eu](mailto:rotorthon.2025@euroavia.eu).

All material must be delivered prior to the deadline, and no late deliveries are accepted.

## 3 Evaluation process

In the days after the delivery, the teams shall attend a 15 minutes Q&A session with the Technical Jury regarding their proposed solution.

The quality of both the solution and the materials is accounted for.

The winner of the online challenge is announced after all solutions have been revised.
